Introduction

This document describes the release of the Enersight OSD 3.01g. You should read this document before installing your copy.

Reason for this Release

Enersight OSD allows users to perform basic tasks on inspection and documentation such as streaming, taking pictures, recording videos, do measurement and annotation, saving, and sharing.

Changes of V3.01g includes:

- **Fixed an issue causing images being not correctly displayed in LAS X.**

Camera Support

Flexacam C3 and Emspira 3.

Enersight OSD 3.01g

- When the new version is first run after installation or update, the EULA is displayed. The user reads and acknowledges the EULA terms before using the software.
- The user can stream live image, take pictures, record videos, control camera settings, do measurements and annotations, compare live image with reference image, save and share images or videos.
- Supported languages: English, Chinese, Japanese, Korean, Portuguese, Spanish, French, German, Italian

Guidelines to update a device:

- The devices can be updated throughout the following steps:
 - Click on or copy the link and download the Firmware/Software file onto a USB stick:
<https://www.leica-microsystems.com/products/digital-microscopes/p/emspira-3/downloads/>
or <https://www.leica-microsystems.com/products/microscope-cameras/p/flexacam-c3/downloads/>
 - Plug the USB stick into your Emspira 3 or Flexacam C3
 - If not done yet, boot the devices embedded software (OSD)
 - Navigate to Settings → General
 - Click on the "Update" button and wait until the procedure is completed
 - Within the settings menu a sensor update button appeared – as both, the Software and the Sensor should be updated
 - The system restarts automatically and is ready to use.
