Certificate Number: **AC-1841**

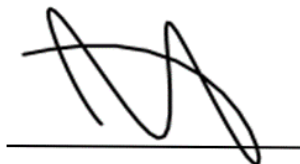

Length – Dimensional Metrology

Parameter/Equipment	Range	Expanded Uncertainty of Measurement (+/-)	Reference Standard, Method, and/or Equipment
Widefield Microscope with Software Measurement Module ¹	Up to 25 mm	6 μ m	Comparison to Stage Micrometer
	Up to 1 in	240 μ in	
Widefield Microscope with Caliper ¹	Up to 25 mm	31 μ m	Comparison to Stage Micrometer
	Up to 1 in	0.002 3 in	

Calibration and Measurement Capability (CMC) is expressed in terms of the measurement parameter, measurement range, expanded uncertainty of measurement and reference standard, method, and/or equipment. The expanded uncertainty of measurement is expressed as the standard uncertainty of the measurement multiplied by a coverage factor of 2 ($k=2$), corresponding to a confidence level of approximately 95%.

Notes:

1. On-site calibration service is available for this parameter, since on-site conditions are typically more variable than those in the laboratory, larger measurement uncertainties are expected on-site than what is reported on the accredited scope.
2. Unless otherwise specified in the far-right column, the calibration procedure utilized by the laboratory was written internally.
3. This scope is formatted as part of a single document including Certificate of Accreditation No. AC-1841.
